MONSTERS

The word "monsters" is often associated with fear and avoidance. However, there are a variety of creatures that can be considered "monsters" in a more positive light. This includes animals, plants, and even human beings. "Monsters" can be defined as any creature that is considered to be different from the norm, either in appearance or behavior. For example, a monster might be a creature that lives underground, or one that can move quickly and change its shape. In this way, "monsters" are often used to refer to creatures that are considered to be "strange" or "different."
